PROFILE

I am a motivated third-year Information Technology student with a strong foundation in programming, database management, and web development. Passionate about learning emerging technologies and applying theoretical knowledge to practical solutions. Seeking opportunities to gain hands-on experience in software development while contributing to innovative projects. Known for strong problem-solving abilities, creative thinking, attention to detail, and eagerness to collaborate in team environments.

PROJECTS

Sellaro - E-commerce Website Builder

A full-featured web application that enables small and medium-sized businesses to create customizable and secure e-commerce websites. Developed using the MERN stack with Next.js, it includes features like plugin-based customization, employee permission control, dynamic banner editing with Fabric.js, and payment methods. Led the development and project management.

SOFT SKILLS

- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

LANGUAGES

- Sinhala
- English

Bun & Run - Smart Food Vending Machine

An innovative vending machine project powered by ESP32 and MicroPython. Features include a touchscreen interface, QR-based payments, automated inventory management, and real-time updates via Firebase. Developed with a user-friendly focus, integrating hardware control with a Node.js backend and admin panel.

Bathlux - E-commerce Platform for Bathware

A web development group project where you led the frontend. Built with HTML, CSS, and JavaScript on the frontend and PHP with SQL on the backend, this e-commerce site allowed browsing, ordering, and inventory tracking of bathware products.
